Boomer

Outdoor balance beam

Boomer is one of the balance equipment options in the Basic series. Its stepping plates give the children a good distance from one plate to the other, while the height difference creates a small challenge when the beam is crossed.

The series assortment of stepping stones and balance equipment can be put together to create a fun obstacle course, or they can be used individually as extra parts on the playground. When children use their ability to balance and take part in games on the balancing equipment, they stimulate their cerebellum. The cerebellum controls the muscle strength used when children, for example, hold a pen or lift a glass of water, thus making it beneficial for their further development to participate in games such as the floor is made of lava. Likewise the game tag also improves the children's spatial awareness, as they must constantly keep an eye on the one catching them and where they have to go next.

Can be mounted directly on the ground

All balance equipment can be mounted directly on the ground, which means that you do not have to use money on a safety surface. The equipment also comes in all price ranges and gives you endless possibilities, as you can combine them exactly as you wish.

Why buy LEDON Basic?

- All the basic elements required for a good-quality, low-priced playground
- Compact towers that require a minimum of space.
- The systems are available in a wide range of variants to meet all
