Obstacle course, straight

Printet 2021-04-08

Obstacle courses in different shapes

Does a low-maintenance obstacle course that can be mounted directly on the ground sound like something for you? Then the obstacle courses in the LEDON Basic series are a good start.

Our straight obstacle course is very versatile, as it can be bent in any direction, which makes it easy to incorporate into an already existing playground. The straight course is also ideal if the children want to compete to see who is the fastest, especially if you have two parallel courses.

When children are balancing on the course and play games such as tag and 'the floor is made of lava', their cerebellum is exercised. The cerebellum controls the muscle strength used when children, for example, hold a pen or lift a glass of water. A game like tag also improves the children's spatial awareness, as they must constantly keep an eye on the one catching them and where they have to go next.

The sky's the limit

The obstacle courses can be constructed in countless ways to fit your exact needs and price range. You can use our composite obstacle courses as inspiration or suggestions for your own dream course. It is also possible to buy the package deals as they are, or change single elements, if you should want that. Like the rest of the LEDON Basic series, the balance equipment is made of recyclable materials and is optimized, which ensures a competitive price.

Why buy LEDON Basic?

- All the basic elements required for a good-quality, low-priced
