Fun and challenges with a slide and a climbing wall

The Basil play tower is one of the play towers in the Basic series, which is both challenging and fun with a slide and a climbing wall as well as a floor height of 140 cm. Our similar **LB120 Bjork** model has a height of 190 cm, if you are looking for an extra degree of difficulty for the older children.

Basil offers one of the playground favourites: the slide. This is accessed via the climbing wall, which is designed with holes and climbing stones. Besides being a fun element on the play tower, the climbing wall also improves the children's gross motor skills and develops their brain. Cross-body movements with the arms and legs strengthen the neural activity between the two sides of the brain, and this interaction is used when learning to read and write. When the floor of the tower is reached, the trip down the slide can be enjoyed at full speed.

Our guarantee for a fun playground

One of our many ways to create a playground that both supports children's natural development and has a high entertainment value is to bring in the experts themselves: the children. Children have a far-reaching imagination and a creativeness that knows no bounds when faced with thinking outside the box. This helps us to push our designs in directions which we could not even think of ourselves.

The Basic series is no exception. Once again, our little experts have been taking part in order to ensure that we hit the mark when we try to make their wishes and dreams of a fun playground come true.

Why buy LEDON Basic?
