## A large selection of play options

Boris is one of our biggest play environments in the Basic series. This model has three towers: two with a floor height of 140 cm and one of 190 cm. On top of that, you will find multiple play zones, a fun slide, a climbing net and climbing walls. Do you want a similar play environment with four towers instead? Then have a look at our **LB450 Brandon** play system.

The Boris play environment consists of three towers that are connected by a climbing net and monkey bars. The model has play zones at ground level for the youngest children and a bunch of exciting climbing activities for the older children in the form of a rope ladder, two climbing walls and a big climbing net. Besides being fun elements on the play system, the climbing activities also improve the children's gross motor skills and develop their brain. Cross-body movements with the arms and legs strengthen the neural activity between the two sides of the brain, and this interaction is used when learning to read and write.

When the floor of the towers is reached, the children can enjoy the view over the playground before they either continue their climb or take a well-deserved trip down the slide from one of the towers.

## An optimised play system that needs less space

For all of our models in the Basic series, we have focused on creating compressed towers with a minimal area requirement, thus giving you a competitively priced play system, where you will also save money on the safety surface, as this is also minimised. This also applies to the models with multiple towers connected by a climbing net. Here, the climbing net also requires a small area and safety surface. In this way, we ensure play equipment at a competitive price that is both fun and

### Specifications

**Order number**

LB350G: In-ground mounting

**Product dimensions (LxWxH)**

547 x 337 x 272 cm

**Area requirement incl. safety distances (LxW)**

850 x 701 cm

**Maximum fall height**

264 cm

**Age recommendation**

From 4 years

**Approximate installation time**

2 persons 16 hours

### Why choose LEDON:

Danish design and production

Playground equipment developed in cooperation with children

Low maintenance playgrounds

Made with sustainable materials

EN1176 certified by TÜV
