Challenging play system with spiral tube slide

The Zulu play system incorporates one of LEDON's popular **tube slides**. This is accessed via the vertical climbing wall panel or the swinging suspension bridge. From here, you slide at high speed down the tube, which leaves you reeling with excitement. Crawling around the system stimulates the children's sense of balance, coordination and motor skills, but all the cross-movements with arms and legs also strengthen coordination between the two sides of the brain, which also happens when children are learning to read and doing mathematics.

Zulu is not just for older children

Even though Zulu has many activities for older children, the system also has a play area for children who are not ready to use the swinging suspension bridges or vertical climbing wall panels. The non-slip ramp provides access to the slide which starts at a height of 90 cm, and the play system also has a number panel and a cave panel with rubber slats at ground level.

LEDON Explore is your guarantee of a high-quality playgrounds

- Designed in cooperation with children to ensure the highest possible play value.
- Developed using materials that require low maintenance and with natural colours.
- 100% Danish-produced

Specifications

Order number
EX375

Product dimensions (LxWxH)
813 x 580 x 441 cm

Area requirement incl. safety distances (LxW)
1090 x 871 cm

Maximum fall height
225 cm

Age recommendation
From 3 years

Approximate installation time
2 persons 19 hours

Why choose LEDON:

Danish design and production

Playground equipment developed in cooperation with children

Low maintenance playgrounds

Made with sustainable materials

EX375

Zulu

Scale 1:100 (when printed in 100%)
