## Stepping stones create a coherent playground

The stepping stones in the Pirates series are useful for connecting the pirate universe with an existing playground. In this way, all the playground equipment can become part of a larger balancing course. The stepping stones come in four different heights, ensuring that it is possible to design a balancing course for children of all ages. The stepping stones are often used in games such as 'the floor is lava', 'tag' and for racing against each other. When children jump from one stepping stone to another, it exercises their gross motor skills, balance and coordination. The galvanized steel posts ensure a solid and maintenance-free construction. Moreover, the stepping stones have a non-slip surface.
